To whom it may concern,

Our dealings with Eric Slot and his team at Alpha Power Solutions has been focused on the reduction of our electrical demand.

We were thrilled when Eric's power factor correction proposal and the implementation thereof back in 2013 has resulted in significant monthly savings as a result of a 17.4% reduction in maximum demand. We are still very happy with our investment and with the ongoing service levels provided by Alpha Power Solutions.

What we appreciated most about working with Eric was their ability to cut through the predictable politics of a project, keep everyone happy, and deliver the expected results and then some.

*Charles Watson*
